Stainless Steel Security Podium

Stylish Look, Brushed Stainless Steel
Construction, Electronics Ready

The new Stainless Podium has fashionable stainless steel accents with rounded edges decorating all three customer facing sides. This gives the podium a sharp look rather than a sharp touch. The transaction counter is built higher to allow more privacy behind the working service.

The structure, exterior, and even the hardware are all stainless steel. So this podium is great for accounts with extreme weather conditions that have to deal with heat, humidity, and/ or coastal air.

** Please note that with any type of steel equipment, maintenance and care precautions need to be taken to ensure the longevity of the product.*
