

The Boss Security Desk

A New Era of Professional Excellence: Taking inspiration from its predecessor, the Portable Professional Security Desk, the Boss Security Desk sets a new benchmark for security and welcome stations. It joins the Custom Portable Professional Security Desks in proudly boasting premium standard features such as a roomy interior, robust stainless steel build, rust-resistant hardware, heavy-duty casters for easy movement, and a sleek brushed stainless steel worktop. It also offers notable upgrades including Schlage keypad locks, trim colors, an elegantly curved counter, an LED lighting kit, and more, exemplifying professional excellence and versatility.

Make the Boss Security Desk work for your business by choosing your perfect mix of shelving, open space, and any of three stylish artwork options. Enjoy the benefits of modular construction with replacement parts that restore functionality to well-worn stations and seamless retrofitting for future upgrades.

The optional LED kit upgrade makes the panels glow. The LED kit is powered by a rechargeable cordless battery system with an 8-hour charge cycle. If you need to light up the podium for longer than 8 hours, it can be plugged directly into an electrical outlet. The LED kit also comes with a remote operated controller which has multiple speed, brightness, and color settings.

Please note the Boss Security Desk should never be left unattended.
